Sync your Magento clients to your Signpost account in real time!

Use our Signpost extension for Magento to sync your Magento clients in real time to your Signpost account. Setup takes 2 minutes, and all syncing is in the background. When a customer signs up in Magento, they will be immediately imported into Signpost for you to market to.

How to use extension:-

Step1 :- Upload extension file via ftp or Install extension via magento connect from magento admin.

Step2:- After uploading clear chache from Magento
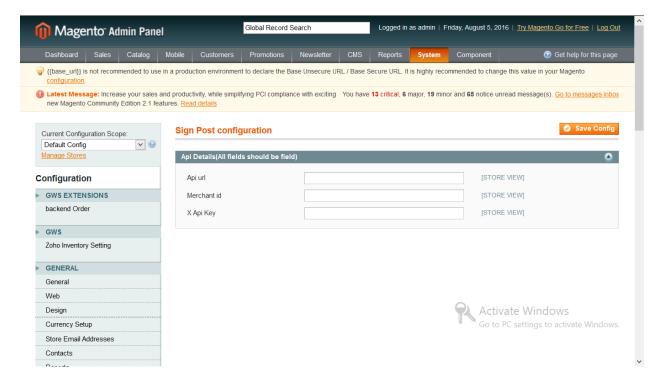

Step3 :- Retrieve API info from Signpost.

You need to login in signpost and get API and merchant id to setup in magento.

Step4 :- Enter API info into Magento admin side of module

You need to enter API url, Merchant id and X api key here.

Step5 :- Finish

FYI about Signpost API

How do I start using the API?

Once you have spoken with your sales representative or account manager about obtaining access, Signpost will provide an authentication token. This token must be included in every API call you make to ensure your data is being accessed and updated securely.

 Whom do I contact with questions?

You can always contact api@signpost.com with questions both during the initial development

phase and after the API integration is up and running. A Signpost representative will respond within 24 hours. If the matter is urgent, please add "URGENT" to the subject line and our team will respond immediately.
